- Select **DG60 Aura** for Mic & Speaker

💡 In call mode, **LED = White solid**

☞ [Using with Auracast device?](#)
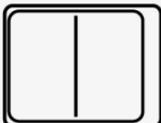

⚠️ Auracast mode does not support mic talking.

Next

4A.1 Auracast Must Know

1. **New Tech** - Only the newest devices support Auracast.
[Check here](#) ↗

2. **Hearing Aids** -"Auracast-ready" ≠ enabled. Only active Auracast works

3. **Connection** - Needs an assistant: device app or Android/Google Auracast Assistant.

⚠️ Important: Auracast devices need to either use an app/assistant or new Android Auracast Assistant to find broadcast channels

Next

4A.2 Start Broadcasting

❶ Slide ⬛Auracast ⬗ 🔲 ✳ → △

❷ Double click (MFB) → Switch between

- ◦ white → Auracast Hearing aids

- ⬓ orange → Auracast headphones/speakers

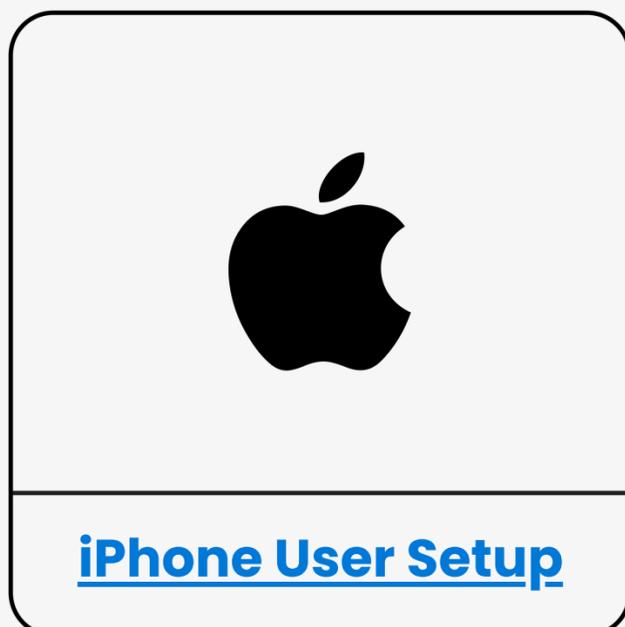

4A.2 Start Broadcasting

**Next**

Choose Auracast Assistant

Your device needs an Auracast Assistant to find broadcasts.

- Some use **their own app** (e.g. ReSound).
- Some rely on the **Android Auracast Assistant** (e.g. Starkey).
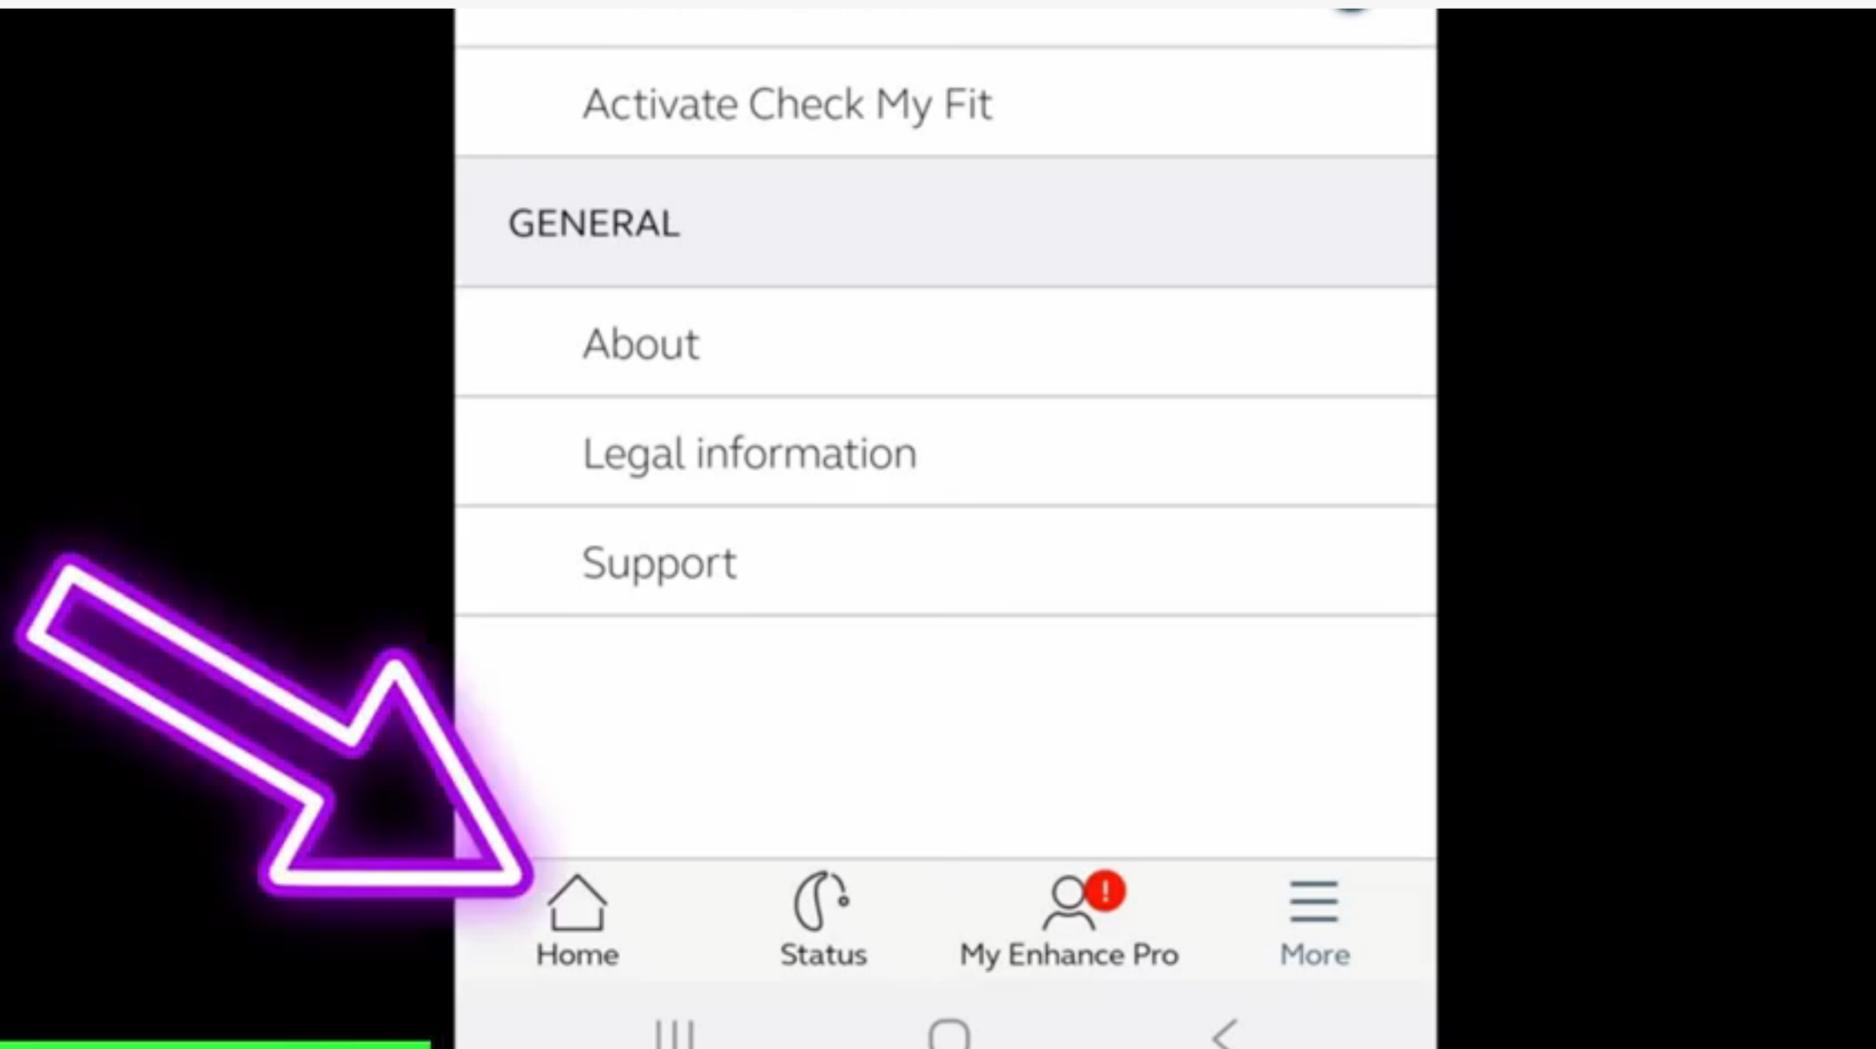

Now select your setup:

iPhone User Setup

Use your **hearing aid's app**

Android Phone User Setup

Use your **hearing aid's app** or the **Android Auracast Assistant**(Android 15+)

4A.3a iPhone User Setup

❶ Pair your device with phone via bluetooth.

❷ Open device manufacturer's app: Turn on **Aurcast assistant** → Find a Broadcast→ **DG60 Aura**.

❸ Play Audio → Enjoy with Auracast device.
